## REACH DECLARATION

As a manufacturer of sheet metal parts according to customer specifications, **PSW-Umformtechnik GmbH** is a “downstream user“ in the meaning of REACH.  
We do not produce any chemical products.

Furthermore, the products we manufacture do not emit any substances under normal and sensibly foreseeable conditions of use. We as a company are therefore neither subjected to a compulsory registration obligation nor do we have a duty to create safety datasheets.

We shall provide you with immediate notification pursuant to REACH – Art 33, should constituents in our products (from a content of >0.1%) be classified as being of a very high concern by the European Chemicals Agency (ECHA). When taking the current situation into account however, we do not assume that this shall be the case.

This notwithstanding, we pursue this matter in our own interest and in order to ensure a high degree of product safety.
